

Sustainable House Day.

Indoors:

Full length pellet and curtain

to help retain heat in Winter & keep out heat in Summer

Porcelain tiles

Flooring to absorb heat from the sun in Winter which releases in the evening to warm the open area.

Double glazed windows - Kitchen

Retain heat in Winter which helps stop transfer of heat. Also helps to reduce noise.

Laminated glass

Hallway doors which have draft exclusion along the bottom. Doors are closed in Winter to seal in heat. Summer the doors are left open for flow through ventilation, West to east & South to North

Door width - 870 wide doorways for accessibility

Wet areas - North facing to assist prevention of mould

Hob less showers - for accessibility
